SUMMARY

About 5 years of experience in software engineering using different programming languages with developing and deploying APIs. Worked as Key Developer and Team Leader in small on-site as well as in distributed tears.

For the last 3 years, I have been working as a node.js backend developer, so the backend stack (Node.js, SQL/NoSQL, UNIX-like systems etc.) is more comfortable for me. In addition to this, I am also into front-end development (React JS, Next JS) and DevOps tools (Docker, AWS).

SKILLS

- Java Script
- MongoDB
- PHP
- TypeScript
- AWS
- HTML
- Bootstrap
- Next.js
- Git
- Microservices
- Node.js
- MySQL
- Laravel
- Nest.js
- Docker
- CSS
- React.js
- Vercel
- Bitbucket
- System Design

EDUCATION

Takshshila Institute of Engineering and Technology, Jabalpur, Madhya Pradesh
BACHELOR OF ENGINEERING
Computer Science & Engineering with(CGPA 7.86) , 06/2019

Maharani Janki Kunwar College, Bettiah, Bihar
Science with Physics, Chemistry, Mathematics
Marks (66.2%) , 06-2014

Alok Bharti Shikshan Sansthan,Bettiah , Bihar
X th
Marks (80.4%) , 06-2012

WORK EXPERIENCE

APPSINVO, DELHI, IN | 03/2021 to Current
Full Stack Developer

Achievements/Tasks

- Started learning microservices architecture to optimize existing projects.
- Utilizing a wide range of technologies and programming languages to develop front-end and back-end functionalities.
- Participating in the entire software development lifecycle, including requirements gathering, design, development, testing, and deployment.
- Implementing best practices and coding standards to ensure high-quality and maintainable code.
- Working closely with clients to understand project requirements and deliver solutions that meet their needs.
- Experience in integrating and working with third-party APIs and services for functionalities like payment processing, social media integration(Chat APIs like Twilio, Socket.io), or geolocation services.
- Proficient to write clear and comprehensive technical documentation.
- completed AWS Solution Architect certification to upgrade skills by taking weekend offline classes.

APPSINVO, DELHI, IN | 03/2020 – 03-2021
Backend developer

Achievements/Tasks

- Served as a backend developer at Appsinvo, contributing to the development and maintenance of robust and scalable applications.
- Actively taking part in software and architectural development activities.
- Back-end development with Laravel.
- Started learning JavaScript and Nodejs to optimize existing projects.
- Learn Project Deployment with AWS (EC2, S3, SES etc.) and Azure .
- Writing complex business logic in JavaScript and PHP to implement functionalities.
- Experience building RESTful APIs.

IT HOURS SOLUTIONS, DELHI, IN| 09/2019 – 03-2020
Web Developer

Achievements/Tasks

- Collaborated with a team of 7 members in a challenging environment to design and develop websites.
- Utilized web development skills to create visually appealing and user-friendly websites.
- Implemented responsive design principles to ensure optimal viewing experience across different devices.
- Ability to quickly learn new technologies, frameworks, and tools to adapt to evolving project requirements .

OMNINOUS SOLUTIONS PVT. LTD., MOHALI, IN | 06/2019 – 09-2019
PHP Intern

Achievements/Tasks

- Developed a fully functional e-commerce website using CodeIgniter Web Framework during a PHP internship.
- Collaborated with a team of developers to design and implement website features and functionalities.
- Conducted thorough testing and debugging to ensure the website's performance and stability.
- Demonstrated strong problem-solving skills and attention to detail in resolving technical issues.
- Acquired valuable experience in web development and gained proficiency in PHP and Laravel.

ACHIEVEMENTS

- Received awards, won competitions, achieved high grades in studies, volunteering .
- Back-end development with Laravel and NodeJS.
- Experience building RESTful APIs.
- Saved the company time and money, increased performance, facilitated growth and
- exceeded work targets etc.

PROJECT ANNEXURE

1. **The Medic verse**
   Description: "The Medicverse" is a comprehensive healthcare management platform designed to streamline patient care, enhance communication between healthcare providers, and improve overall efficiency in medical facilities. There are three modules in over all project Doctor, Hospital, Admin.

   ### Roles and Responsibilities:

   - Collaborated with a cross-functional team of developers, designers, and stakeholders to conceptualize, design, and develop The Medicverse platform.
   - Designed and develop backend services .

   Technologies: Nodejs , MongoDB , AWS EC2, S3 , SES , vercel

   Website: https://www.themedicverse.com

2. **Absolute Matrimony**

   Description: "Absolute Matrimony" is a matrimonial portal using the customer-to-customer (C2C) business model. it offers features like free listings, search, express interest, and more.

   Roles and Responsibilities:
   - Designed and develop backend services .
   - Built APIs, managed databases and AWS servers.

   Technologies: Nodejs , MongoDB , AWS EC2, S3 , SES , vercel

   Website: https://absolutematrimony.com

3. **BookYourGift**

   Description: "BookYourGift" is an e-commerce platform designed to simplify the process of buying and sending gifts online. The platform allows users to browse through a wide selection of gift items, personalize their orders, and schedule deliveries for special occasions.

   Roles and Responsibilities:
   - Designed and develop backend services .
   - Built APIs, managed databases and AWS servers.

   Technologies: NextJs, APIs(Laravel) , MySQL, AWS

   Website: https://www.bookyourgift.in

4. **India-Assist**

   Description: "India-Assist" is a comprehensive web application designed to provide assistance and support to travelers visiting India. The platform offers a range of features including itinerary planning, accommodation booking, transportation assistance, emergency contact information, and local guide recommendations.

   Roles and Responsibilities:
   - Designed and developed backend services .
   - Also worked on front-end functionality like :- web and admin panel.
   - Built APIs, managed databases and AWS servers.

   Technologies: Laravel, Node.js, MySQL, Firebase , AWS

   Website: https://weassistindia.com

5. **Clever Band Assist**

   Description: "Clever BandAssist" is the all-in-one solution to manage band and concerts . There are modules in this project Musician , Band and Admin. It is free band and concert management software.

   Roles and Responsibilities:
   - Designed and developed backend services .
   - Built APIs, managed databases and AWS servers

   Technologies: Node.js, MySQL, AWS

   Website: https://cleverbandassist.com

6. **Car-Valuate**

   Description: : "Car-Valuate" is a web application designed to assist users in accurately evaluating the market value of their vehicles. Leveraging advanced algorithms data analysis, the platform provides users with their cars based on various factors such as make, model, year, mileage, and condition.

   Roles and Responsibilities:
   - Designed and developed backend services .
   - Also worked on front-end functionality like :- web and admin panel.
   - Built APIs, managed databases and AWS servers.

   Technologies: : APIs(Laravel) , MySQL, AWS EC2 , S3
